TagTeam[®] Soybean Granular Registered

SASKATOON, SK — Philom Bios Inc. is pleased to announce it has received regulatory approval in western Canada for TagTeam soybean granular inoculant. TagTeam soybean granular represents the second new product registration for soybean and Philom Bios' fifth new product registration for the 2007 crop year.

New product registrations received for the 2007 crop year are:

- Next Generation TagTeam pea/lentil peat
- Next Generation TagTeam pea/lentil granular
- TagTeam chickpea granular
- TagTeam soybean peat
- TagTeam soybean granular

All TagTeam inoculants are patented and are the world's-only combinations of crop specific nitrogen fixing rhizobia and the phosphate solubilizing fungus, *Penicillium bilaii*.

“Our investment in innovation continues to pay dividends for our farmer customers with the latest product registration and the registrations received over the last few months,” says Calvin Sonntag, President/CEO of Philom Bios. “In a year of rising fertilizer costs, the nitrogen and phosphate fertility components of our *MultiAction*[®] TagTeam inoculants will yield even more value to our farmer customers.”

-30-

Philom Bios is a world leading Inoculant Company with over 75 employees across North America in research, manufacturing, marketing and management and in its joint-venture operations in Australia. Headquartered in Saskatoon, SK, Philom Bios is a Canadian public company serving the needs of farmers with high-value inoculants.
